Subject Index of Volume 77

Algorithm
the numerical simulation of a dense assembly of particles with elasto-frictional interaction, 115
Anti-caking agents
selection of anti-caking agents through crystallization, 1
Attrition index
an attrition index to assess fines formation and particle size reduction in tapped agglomerated food powders, 89

Beneficiation
beneficiation of calcined colemanite tailings, 215
Bimodal sized particulates
some rheological properties of bimodal sized particulates, 31
Briquetting
briquetting of zinc oxide fines, 153
Bubbles
effect of bubble coalescence on entrainment in gas fluidized beds, 251
Bulk solids
the variation in the behaviour of bulk solids as a result of sudden pressure changes in the surrounding gas phase, 221

Circulation
circulation of particles in two-dimensional spouted beds with draft plates, 233
Coal
transport velocities of coal and sand particles, 61
Coalescence
an investigation of the kinetics of granulation using a high shear mixer, 159
effect of bubble coalescence on entrainment in gas fluidized beds, 251
Colemanite
beneficiation of calcined colemanite tailings, 215
Comminution
steady fluidization of fine particles in a fixed bed of coarse particles, 291
Computerized modelling
numerical analysis of liquid–solids suspension velocities and concentrations obtained by NMR imaging, 301
Computer simulation model
computer simulation model of a Nauta mixer, 19
Conveying
a model for gas–solid stratified flow in horizontal dense-phase pneumatic conveying, 107
Crystallization
selection of anti-caking agents through crystallization, 1

Deutsch model
reflections on similarity laws concerning particle transport in electrical precipitators, 201
Discrete particle simulation
discrete particle simulation of two-dimensional fluidized bed, 79
Drag
a rational approach to drag prediction of spherical and nonspherical particles, 143
Drag coefficient
modeling and measurement of the effective drag coefficient in decelerating and non-accelerating turbulent gas–solids dilute phase flow of large particles in a vertical transport pipe, 267
Dry grinding
effect of fatty acid additives on the material flow properties of dry grinding, 69

Entrainment
effect of bubble coalescence on entrainment in gas fluidized beds, 251

Fatty acid additives
effect of fatty acid additives on the material flow properties of dry grinding, 69
Fines
briquetting of zinc oxide fines, 153
Fines formation
an attrition index to assess fines formation and particle size reduction in tapped agglomerated food powders, 89
Fish-hook effect
the origin of the fish-hook effect in hydrocyclone separators, 243
Fixed beds
steady fluidization of fine particles in a fixed bed of coarse particles, 291
angular void fraction distributions in randomly packed fixed beds of uniformly sized spheres in cylindrical containers, 313
Fluidization
steady fluidization of fine particles in a fixed bed of coarse particles, 291
Fluidized beds
discrete particle simulation of two-dimensional fluidized bed, 79
pressure fluctuations at individual grid holes of a gas–solid fluidized bed, 95
an experimental study on the effect of particle shape on fluidization behavior, 123
simplified scaling relationships for fluidized beds, 177
effect of bubble coalescence on entrainment in gas fluidized beds, 251
Food powders
an attrition index to assess fines formation and particle size reduction in tapped agglomerated food powders, 89

Gas–solid mixtures
measurement of particle velocity distribution in a vertical channel, 135
Granular materials
analysis of rapid shear flows of granular materials by a kinetic model including frictional losses, 7
Granulation kinetics
an investigation of the kinetics of granulation using a high shear mixer, 159
Grid holes
pressure fluctuations at individual grid holes of a gas–solid fluidized bed, 95

Hydrocyclones
the origin of the fish-hook effect in hydrocyclone separators, 243

Inclined conveyor
analysis of particle motion regarding shape separation using an inclined conveyor, 55

Kinetic model
analysis of rapid shear flows of granular materials by a kinetic model including frictional losses, 7

L-valve equations
L-valve equations, 49

Magnet powders
magnetic properties of nylon 6 based Nd-Fe-Co-Zr-B pellets for injection molding, 285
Material flow properties
effect of fatty acid additives on the material flow properties of dry grinding, 69
Mixing
an investigation of the kinetics of granulation using a high shear mixer, 159
Modelling
a rational approach to drag prediction of spherical and nonspherical particles, 143
modeling and measurement of the effective drag coefficient in decelerating and non-accelerating turbulent gas–solids dilute phase flow of large particles in a vertical transport pipe, 267
Models
a model for gas–solid stratified flow in horizontal dense-phase pneumatic conveying, 107

Nauta mixer
computer simulation model of a Nauta mixer, 19
NMR imaging
numerical analysis of liquid–solids suspension velocities and concentrations obtained by NMR imaging, 301
Non-Newtonian flow
viscous non-Newtonian flow in packed beds: effects of column walls and particle size distribution, 171

Optical probe
measurement of particle velocity distribution in a vertical channel, 135

Packed beds
viscous non-Newtonian flow in packed beds: effects of column walls and particle size distribution, 171
Particle assembly
the numerical simulation of a dense assembly of particles with elasto-frictional interaction, 115
Particle motion
analysis of particle motion regarding shape separation using an inclined conveyor, 55
measurement of fluctuations in motion of particles in a dense gas–solid suspension in vertical pipe flow, 209
Particle shape
an experimental study on the effect of particle shape on fluidization behavior, 123
Particle size reduction
an attrition index to assess fines formation and particle size reduction in tapped agglomerated food powders, 89
Physical properties
sound absorption measurements for evaluating dynamic physical properties of a powder bed, 39
Powder bed
sound absorption measurements for evaluating dynamic physical properties of a powder bed, 39
Precipitators
reflections on similarity laws concerning particle transport in electrical precipitators, 201
Pressure fluctuations
pressure fluctuations at individual grid holes of a gas–solid fluidized bed, 95
Pressurization
the variation in the behaviour of bulk solids as a result of sudden pressure changes in the surrounding gas phase, 221
Process optimization
magnetic properties of nylon 6 based Nd-Fe-Co-Zr-B pellets for injection molding, 285

Rapid shear flows
analysis of rapid shear flows of granular materials by a kinetic model including frictional losses, 7
Rheological properties
some rheological properties of bimodal sized particulates, 31

Sand particles
transport velocities of coal and sand particles, 61
Scaling parameters
simplified scaling relationships for fluidized beds, 177
Shape separation
analysis of particle motion regarding shape separation using an inclined conveyor, 55
Simulation
the numerical simulation of a dense assembly of particles with elasto-frictional interaction, 115
Size distribution
viscous non-Newtonian flow in packed beds: effects of column walls and particle size distribution, 171
Sluice systems
the variation in the behaviour of bulk solids as a result of sudden pressure changes in the surrounding gas phase, 221
Slurries
numerical analysis of liquid–solids suspension velocities and concentrations obtained by NMR imaging, 301
Sound absorption measurements
sound absorption measurements for evaluating dynamic physical properties of a powder bed, 39
Sphericity
a rational approach to drag prediction of spherical and nonspherical particles, 143
Spouted beds
circulation of particles in two-dimensional spouted beds with draft plates, 233
Stratified flow
a model for gas–solid stratified flow in horizontal dense-phase pneumatic conveying, 107
Suspension
measurement of fluctuations in motion of particles in a dense gas–solid suspension in vertical pipe flow, 209

Tailings
beneficiation of calcined colemanite tailings, 215

Transition metals
magnetic properties of nylon 6 based Nd-Fe-Co-Zr-B pellets for injection molding, 285
Transport
reflections on similarity laws concerning particle transport in electrical precipitators, 201
measurement of fluctuations in motion of particles in a dense gas–solid suspension in vertical pipe flow, 209
Transport model
angular void fraction distributions in randomly packed fixed beds of uniformly sized spheres in cylindrical containers, 313
Transport velocities
transport velocities of coal and sand particles, 61
Turbulent flow
modeling and measurement of the effective drag coefficient in decelerating and non-accelerating turbulent gas–solids dilute phase flow of large particles in a vertical transport pipe, 267

Velocity distribution
measurement of particle velocity distribution in a vertical channel, 135
Vertical pipe flow
measurement of fluctuations in motion of particles in a dense gas–solid suspension in vertical pipe flow, 209
modeling and measurement of the effective drag coefficient in decelerating and non-accelerating turbulent gas–solids dilute phase flow of large particles in a vertical transport pipe, 267
Void fraction
an experimental study on the effect of particle shape on fluidization behavior, 123
angular void fraction distributions in randomly packed fixed beds of uniformly sized spheres in cylindrical containers, 313

Wall effects
viscous non-Newtonian flow in packed beds: effects of column walls and particle size distribution, 171
angular void fraction distributions in randomly packed fixed beds of uniformly sized spheres in cylindrical containers, 313

Zinc oxide
briquetting of zinc oxide fines, 153
